

# Data Analytics Consultant Energy Trading & Risk Management (m/d/f)

## Our Company

FERDEC ([www.ferdec.com](http://www.ferdec.com)) is a leader in Transaction Surveillance software for the energy and commodity trading sector. We provide consultancy services to major oil, gas and power trading companies who use our innovative Transaction Surveillance solution, ferdecTS®, both in Europe and globally. FERDEC recently became part of CubeLogic ([www.cubelogic.com](http://www.cubelogic.com)), a market leader in business intelligence enabled enterprise risk management software for all market, credit, liquidity and compliance risks in energy, commodity and financial markets. As a firm we are committed to developing and delivering high end solutions to help our clients overcome current and future challenges enabling them to become leaders in their sector.

## Why work for FERDEC?

*Would you like to work in Berlin, the tech start-up capital of Europe? Would you like to work with a team of diverse, experienced, close-knit professionals where your input is valued, and your effort is rewarded? Would you like to work in Reg Tech, one of the fastest growing business sectors last year? Are you up for the challenge and responsibility of a consulting career which will take you to interesting locations around the globe? If you answered yes to these questions, we would love to hear from you.*

Founded in 2012, FERDEC is a fast-growing technology firm and consultancy with its roots in the European energy market. With our recent acquisition by CubeLogic, we now have global reach and ambition with offices in Berlin, London, Houston, Bangalore and Singapore, serving a large customer base of 35 and growing, 50% of them Fortune 500 and located globally. We would like the right candidate to be a part of our success story.

Due to increasing client demand, we are enhancing our core capabilities in data analytic solutions to incorporate next generation technologies, including Artificial Intelligence and Machine Learning. As the main interface to our clients, you will play an integral role in understanding our clients' current and future needs to help them stay ahead of the curve by getting the maximum benefit from our market leading solutions.

Working at FERDEC, while rewarding, can also be challenging at times but also inspiring for the right candidate, providing you with many opportunities to innovate and grow. You will be working together with top energy and commodities trading organisations in Europe and beyond, and will work together with respected trading, compliance and risk management experts.

## The Role

The key features of your role include:

- Taking over ownership for delivering our solutions to our clients and support them in their operations and becoming a product expert (full training will be provided where required).
- Enjoying working as self starting individual and as part of a team
- Being responsible for the rapid set-up of our solutions for new clients and the delivery of enhancements to existing clients, including requirements' gathering and analysis around client's data analytics capabilities.
- You will be expected to remain abreast of market and regulatory developments relevant to our solutions.

[www.ferdec.com/Career](http://www.ferdec.com/Career)

- Possibility to also grow into providing services for our CubeLogic credit and market solutions
- You will support the Product Owners in defining and implementing enhancements to our solutions.
- You will help to develop out methods, documentation and tools to improve our service delivery and support our sales initiatives.

### The Candidate - Your Checklist

- You have successfully completed your Economics, Business Administration, Energy Economy, Mathematics B.Sc / M.Sc and are interested in applying and developing innovative data analytics approaches?
- You have min 1-2 years experience in trading, consulting or business analysis (energy market nice to have but not essential), a desire to work with data analytics and a willingness to develop your energy and commodity market knowledge
- Working experience with Microsoft technologies like Office, Sharepoint, PoerBI and ideally SQL etc.
- You are open to travelling on a regular basis
- You want to make impact in a small company rather than being just a number in a large one?
- You have a passion for consultancy and like to work with people from different background and cultures?
- You want to take on responsibility early in your career?
- You are fluent English (required) and you have good German knowledge (nice to have)?
